Docket No. 266/171

Sheet No. 5 of 7

mRNA expression in mouse tissues

mRNA expression after kidney ischemia/reperfusion

**Measurement of IAP mRNA
activation during kidney I/R ***

*** At least 4 animals were analyzed per each group.**

Data are expressed as the mean \pm SEM.

Figure 6

Overexpression of IAP in Hela cells

Hela cells were transfected with plasmid DNA, containing pEF/myc/cyto vector (Invitrogen) containing human IAP cDNA. After 48 hrs cells were lysed and total cellular extract was analyzed by Western blotting using anti-IAP rabbit polyclonal Ab and Phototope-HRP Western Blot Detection Kit (BioLabs) as described in manufacturer's protocol.
